- Top Skills: React.js, Node.js, Javascript, Python, Java, Git, Docker, AWS: EC2, RDS, S3, DynamoDB
- Languages: Javascript, Python, Java, Typescript, SQL, HTML, CSS
- Proficiencies: Docker, React.js, Node, Nginx, Apache, AWS, EC2, S3, RDS, DynamoDB, Vue.js, Git, MongoDB, Mongoose, PostgreSQL, MySQL, Express.js, Javascript, Python, Java, SQL, HTML, CSS, Tailwind, Bootstrap, Flask, Django, Django Rest Framework, jQuery, Puppeteer.js, Material UI, React Icons, Figma, Adobe Illustrator
- Soft Skills: Communication, Leadership, Efficiency, Flexibility, Project Management, Analytical Abilities, Problem Solving, Perseverance, Resourcefulness, Teamwork, Resilience

Professional Experience

Lead Developer

SpaceLab

March 2024 - June 2024

- Managing the AWS console by setting up Ec2 instances, serving our webpages using Nginx and Apache, handling our DNS records, and deploying our web applications.
- Create and manage tickets for frontend tasks, ensuring clear requirements and priorities are communicated to the team.
- Monitor pull requests submitted by team members, providing constructive feedback and guidance to ensure code quality and adherence to coding standards.
- Drive the advancement of the frontend team by setting clear goals, providing mentorship, and fostering a culture of continuous learning and improvement.
- Act as a technical advisor and escalation point for frontend-related issues, resolving challenges and guiding team members towards effective solutions.
- Foster a collaborative and inclusive team environment, encouraging open communication, knowledge sharing, and mutual support among team members.

Frontend Developer

SpaceLab

November 2021 - March 2024

- Key role in React.js development on the Frontend Team
- Design and implement mobile-first footer for enhanced user experience
- Collaborating with the Design team in resolving CSS issues within components
- Updating and creating forms for the contact page
- Implementing workarounds for Apache routing issues
- Responsible for generating tickets based on reported issues for resolution
- Collaborate with team members to address and resolve development challenges

- Delegate tasks among the frontend team using our git workflow
- Resolving git rebase issues with greener interns within our cohorts

Graphic Designer / Owner

TSL Printing Co., Maryland

January 2015 - January 2024

- Manage administrative tasks including ordering supplies and overseeing shipping operations
- Create and Negotiate Contracts with companies and individuals
- Coordinate with Production Team
- Handle account management and customer relations
- Execute marketing strategies to increase company visibility and attract new clients via social media platforms
- Provide graphic design services for clients, collaborating with master printers for production operations

Education

B.S. in Software Development & Security

University of Maryland Global Campus at College Park, MD

June 2022 - December 2023

- Completed 23 courses (65 credits) in 18 months and received a 4.0 to complete my degree.
- I specialize in developing secure software applications using Python and Java, following industry-standard security guidelines from Microsoft, Oracle, OWASP, and CWE.
- I have hands-on experience deploying secure software in AWS environments, leveraging essential services such as S3, Lambda, DynamoDB, and RDS.

Certificate in Full-Stack Software Development

General Assembly at Washington, DC

February 2021 - April 2021

- Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.

2 Years in Marketing

Louisiana State University at Baton Rouge, LA

September 2011 - June 2013

- Completed 55 credits (2 years) at LSU.
